

AlfaBlue Junior AG(H)

Air-cooled condensers – commercial range

General information & application

In addition to the well-proven AlfaBlue condenser line, the new generation of AlfaBlue Junior commercial condensers is a competitive condenser line of robust construction and high rigidity, that has every feature you need.

AlfaBlue Junior offers excellent performance especially at low air flow rates, allowing easy installation on site and an outstanding integration with other components. Highly efficient fan motors combine excellent sound characteristics and low energy consumption.

AlfaBlue Junior condensers may be used in commercial refrigeration and A/C installations.

Refrigerants	all H(C)FC
Capacities*	5.2 up to 240.7 kW

* Nominal capacities ($T_{air} = 25^{\circ}\text{C}$, $T_{cond} = 40^{\circ}\text{C}$, $T_{subcool} < 3\text{K}$, $T_{superheating} = 25\text{K}$)

Coil

An innovative coil design based on 8 mm copper tubes and corrugated aluminium turbo fins provides excellent heat transfer at minimal refrigerant charge. Standard fin spacing is 2.1 mm.

Casing

The coil frame is made from AlMg₃ for protection against vibration and thermal expansion. Corrosion resistant casing material, pre-painted RAL9002. Separated fan sections.

Fan motors

High efficiency AC or EC fans with innovative polymeric fan blades and low power consumption. Available in four fan diameters (350, 400, 500 & 630 mm), different power supplies (230/50-60/1, 400/50-60/3) and four noise levels.

Protection class IP 54 according to DIN 40050.

AC motors are fitted with integrated thermo contacts to provide reliable protection against thermal overload (terminals in the box). Motors may be wired to one or more common terminal boxes.

AlfaBlue Junior AGH

A special range of High Pressure condensers is available with circuiting design optimized for refrigerant R410A. This AGH range has been specifically developed for AC applications and may be tailor made for OEM use.

AlfaBlue Junior AG

Options

- Safety switches (SW)
- Terminal box for electric power connection (CB)
- Fan speed control 230/1 and 400/3 (BFP)
- Coil corrosion protection
 - Fins epoxy coated (EP)
 - Fins seawater resistant aluminium alloy 57S/5052 (SWR)
 - Blygold treatment (BY)
 - F-coat treatment (FC)
- Fin spacing 2.5 mm
- Vibration dampers (VD)
- End covers (CV)

Customisation (on request)

- Split circuits (50/50 %)
- Sub-cooling circuit
- Reverse setup (fitted with blow through fans, for high air-in temperature applications)
- Heat pump application

Certifications

All condenser models are "Eurovent Certify All" certified. The Alfa Laval quality system is in accordance with ISO 9001. All products are manufactured according to CE and PED rules.

Design pressure

Design pressure 33 barg, 40 barg for AGH.

Each heat exchanger is leak tested with dry air and finally supplied with a nitrogen pre-charge.

Selection

Selection and pricing is to be performed with our Alfa Laval air heat exchanger selection software. Please contact our sales organization for details and full technical documentation.

Code description

AG	H	S(E)	35	2	A	S	H/V	BO	*	-	AL	2.1	CU	R410A	*
1	2	3	4	5	6	7	8	9	10		11	12	13	14	15

- 1 AlfaBlue Junior condenser
- 2 High pressure range for R-410A
- 3 Sound level/fan code: S=standard, L=low, Q=quiet, R=residential, E=EC fan motor)
- 4 Fan diameter (35=350, 40=400, 50=500 mm, 63=630 mm)
- 5 Number of fans (1 to 6)
- 6 Tube rows code (A, B, C)
- 7 Phases (S=monophase, D=three phases)
- 8 Suitable for both horizontal & vertical installation
- 9 Transport packing (BO=box, P=pallet, CR=crate)
- 10 Options
- 11 Fin material/coating (AL=aluminium, IF=industrial fins, SWR=AlMg2.5, EP=epoxy coated alu, FC=F-coat, BY=Blygold)
- 12 Fin spacing (2.1 mm, 2.5 mm)
- 13 Tube material (CU=copper)
- 14 Refrigerant (for H-execution only)
- 15 Extra options

Benefits

- Reduced refrigerant charge.
- Circuiting optimized to selected fan speed.
- Excellent sound characteristics, suitable for residential applications.
- Reliable performance, Eurovent certified.
- Easy installation & maintenance.
- Energy efficient - low total cost of ownership.
- Damage-proof packing in sturdy cardboard box on pallet. Bigger units in a crate and wrapped with plastic foil.
- Stock units available.
- Two-year product guarantee.
- Easy access to additional on-line product information (QR code)

How to contact Alfa Laval

Up-to-date Alfa Laval contact details for all countries are always available on our website at www.alfalaval.com
